NANOPROTEIN TREATMENT

PREMIUM LINE

NATURAL POWER, LONG-LASTING SMOOTHNESS
GLASS-LIKE SHINE AND LUXURIOUS HAIR REPAIR

WHY CHOOSE LUMI LISS NANOPROTEIN?

- Long-lasting results – enjoy sleek, silky hair for up to 6–8 months
- Formaldehyde-free – safe for both clients and stylists
- Effectively reduces frizz, volume, and rough texture
- Leaves hair smooth and shiny without making it flat
- Deeply nourishing – visibly improves the overall condition of the hair

PACKED WITH NOURISHING NATURAL INGREDIENTS:

- Amla oil – rich in antioxidants, adds shine and strengthens
- Coconut oil – hydrates, repairs, and protects against breakage
 - Rice oil – smooths and fortifies the hair
- Jasmine oil – enhances manageability with a delicate fragrance
- Shea butter – deeply nourishes, protects ends, and boosts elasticity
 - Plus: Keratin, Biotin, and Horsetail Extract for added strength and resilience

WHY SWITCH TO LUMI LISS?

- Safe, EU-registered formula (CPNP certified)
- Higher concentration of active ingredients at outstanding value
- Streamlined treatment – faster drying and straightening (up to 50% quicker)
- Comfortable for stylists – no harsh fumes, no tugging, no heavy feeling on the hair

IT'S TIME FOR A CHANGE. IT'S TIME FOR LUMI LISS.

HOW TO APPLY THE TREATMENT

PREPARATION BEFORE TREATMENT:

- Shake the bottle thoroughly before use to ensure the product is well mixed.
- Carry out an allergy patch test on the client prior to application.

LUMILISS TREATMENT – STEP BY STEP:

1. Gently wash the hair with a clarifying shampoo.
- 2. Blow-dry the hair completely (100%).**
3. Apply the product evenly, section by section, from root to tip.
Important: Do not apply directly onto the scalp – leave a gap of approximately 0.5 cm.
4. Leave the product to process for **40 to 60 minutes**.
For very coarse, curly, or afro-textured hair, leave on for up to **90 minutes**.
5. Rinse out **80–90%** of the product using lukewarm water.
6. Blow-dry the hair **fully** (a ceramic brush may be used for better results).

STRAIGHTENING GUIDE: TEMPERATURE & PASS COUNT

| HAIR TYPE | IRON TEMPERATURE | NUMBER OF PASSES |
|---------------------------------|------------------|------------------|
| NATURAL, THICK, RESISTANT HAIR | 220–225°C | 18–22 |
| MEDIUM-THICKNESS, COLOURED HAIR | 210–220°C | 17–20 |
| FINE, BLEACHED, OR BLONDE HAIR | 180–200°C | 10–15 |

POST-TREATMENT CARE

1. After completing the treatment, perform a cleansing wash using **Premium Line shampoo**.
2. To avoid the hair feeling stiff or weighed down, wash thoroughly – **up to 3 times**, if needed.
3. Once the product has been rinsed out:
 - Apply a **mask from the Premium Line range**.
 - Massage it thoroughly into the hair.
 - Leave it on for **10–15 minutes**.
 - Then rinse well and dry the hair.

WORKING ON BLONDE, BLEACHED, SENSITISED OR DAMAGED HAIR:

For bleached, sensitised, or weakened hair, it is essential to reinforce and restore the hair before performing the Lumiliss treatment.

We recommend the **Pro Repair Complex** regeneration treatment.

This can be done as a **series of treatments spaced 3 weeks apart**, or, if suitable, as a **single treatment** on the same day, just before applying the **Lumiliss nanoprotein straightening**.

COLOURING & BLEACHING AFTER LUMILISS TREATMENT:

- **Hair colouring** may be done **5–7 days after** the treatment.
- **Bleaching** should only be carried out **after at least 30 days**.
